9. In Distribution of Tacrolimus or C/D ratio section

1. Text below the heading seems confusing for HCP and it is not a tool either so we need to display that **We use matrix of data as a source of the C/D ratio results. So when users enter the value of TDD and the value of Trough Level the tool checks in the matrix and returns the result.**
2. Info cloud is not active.
3. Unit of trough level should be changed to **ng/ml, zakres od 0,1 do 30**
4. We should use **commas** in the field instead of dots.
5. Unit of Tacrolimus daily dose to be changed from mg to **(mg; od 0,5 do 30)**
6. We should use **commas** in the field instead of dots.
7. Spell error in heading, it is **Creatinine**
8. Its unit should be changed to **(mg/dl)**

← GO BACK

Distribution of the tacrolimus C/D Ratio

The tool aims at calculating the C/D ratio values and providing a graphical representation. The C/D ratio values are not intended to define the therapeutic strategy but, represent a potentially helpful addition to the clinical monitoring of tacrolimus therapy. The tool calculates the C/D ratio values regardless of the oral tacrolimus formulations (i.e. prolonged-release tablets, immediate- and prolonged- release capsules). Please refer to the list below for a selection of the current literature.

Trough Level
(ng/mL)

6.2

Tacrolimus total daily dose taken
(mg)

3.75

Creatinine
(mg/dL)

Date

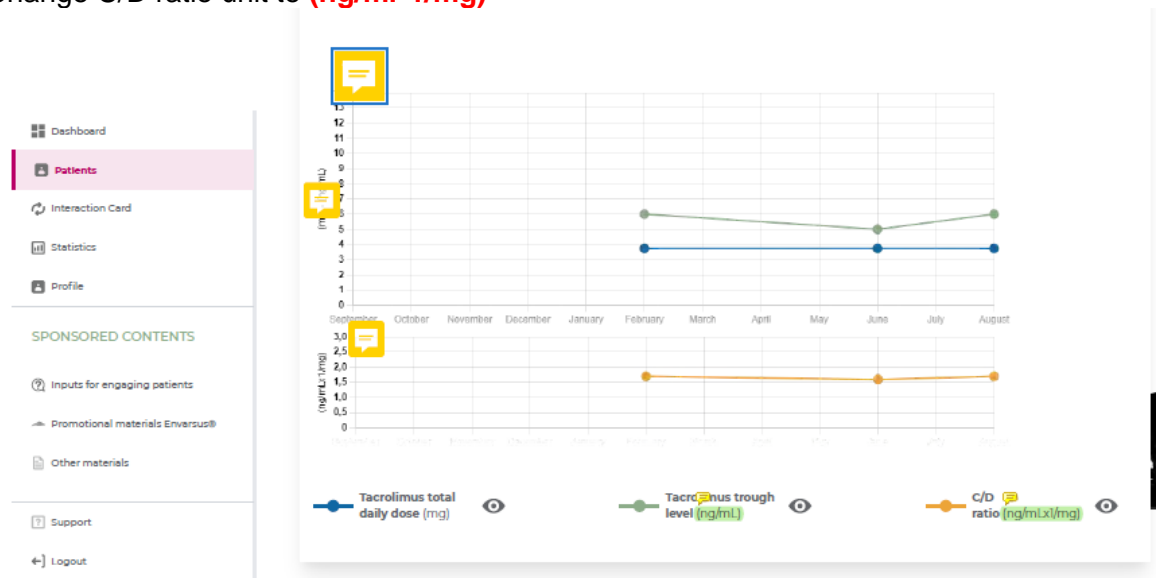

17/08/2021

- 9.
10. Below calculate button, in the line Result (Concentration (ng/ml) / dose (mg) = C/D ratio (ng/ml*mg (-1))) we are using wrong notation , it should be **(ng/ml*1/mg)**

10. Need to make changes in C/D ratio Graph

- Please add the title of the first graph (PL): **Dawka dobową i stężenia minimalne takrolimusu**
- Change the name of the axis:
 - Total daily dose to **Dawka dobową takrolimusu (mg)**
 - Trough level to **Stężenie minimalne takrolimusu (ng/ml)**
- Change C/D ratio unit to **(ng/ml*1/mg)**

4 **SELECT PATIENT**
If your query is related to a patient, please select the patient as reference. Please know that the patient information remains anonymous to the technical team.

c.

16. At the bottom of each page, we need to add last update date. So, user can see when this page was last updated. Suppose whole website we created on 1st Sep. And C/D ratio page changes on 8th Sep, so it will have this date on bottom.

a. Last Updated: 8th Sep, 2021. (maybe we can add timeframe too.)
