CORONAVIRUS UPDATES

June, 1st 2021

Corcym Coronavirus (COVID-19) Business Continuity Statement

The Covid-19 pandemic has resulted in unprecedented global challenges. As a major provider of products critical for cardiac surgeons in caring for patients with structural heart disease, CORCYM has instituted the following actions, to ensure uninterrupted access to our products while maintaining employee safety.

- **Optimized manufacturing to ensure product availability:**
CORCYM has optimized various production lines at its manufacturing locations to be responsive to changes in availability of materials and supplies caused by the pandemic. We are working with our suppliers to ensure we will be able to meet future demands for our products, while maintaining our commitment to customer support.

· **Workplace changes for employee safety:**
To ensure the safety of our production-critical employees we have instituted additional cleaning measures, social distancing and the use of personal protective equipment at our manufacturing sites. We have also implemented remote working options to allow many employees to maintain effective work schedules while minimizing their exposure.

Details regarding our plans to ensure employee safety according to these measures include:

- **BURNABY COVID-19 SAFETY PLAN** PDF 

- **SALUGGIA COVID-19 SAFETY PLAN** PDF 

Circumstances are dynamic and we will provide updates for our future plans based on the latest information. We remain committed to these practices ensuring product availability while maintaining employee safety. Please do not hesitate to contact your local CORCYM representative with any questions.
